

# Nomadic Display<sup>®</sup> Introduces

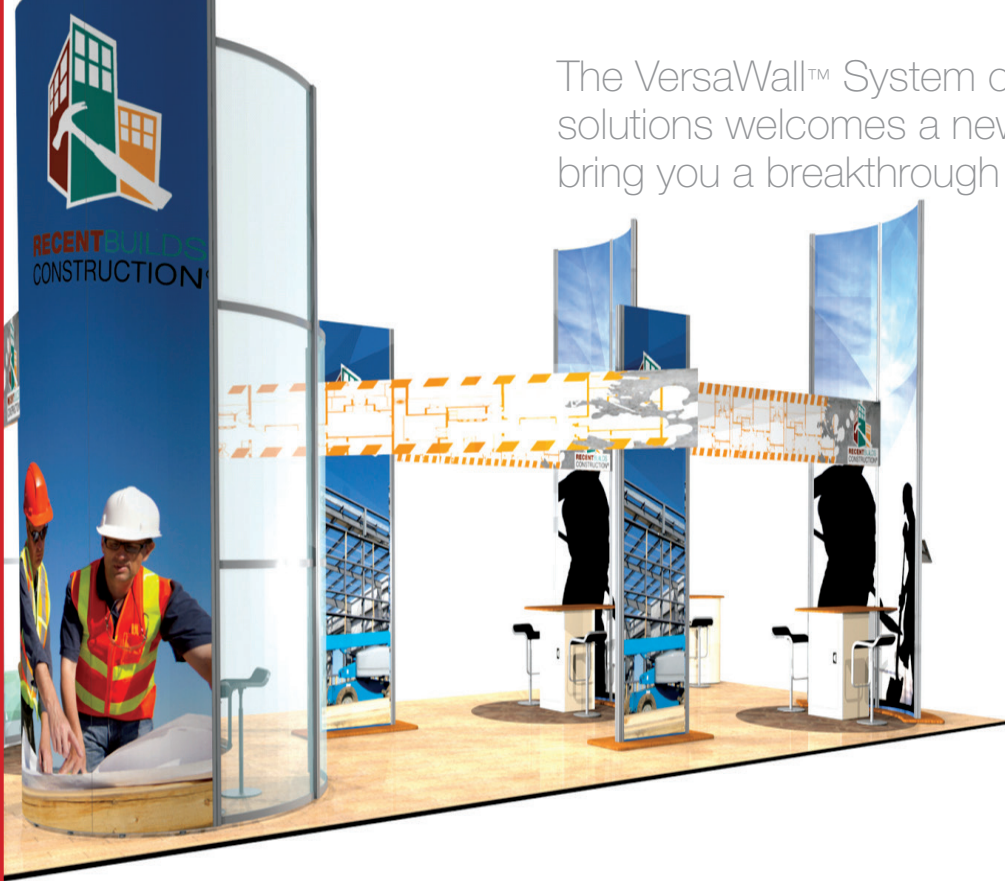

VersaWall™ System

The VersaWall™ System of advanced hybrid display solutions welcomes a new collection of designs to bring you a breakthrough in wall systems.

## Architectural Appeal

Our latest design innovation seamlessly blends architecture and breathtaking large-scale graphics to deliver a powerful presentation. Show-stopping design is fundamental to everything we do. We help you create an environment designed to drive interaction.

Graphic VersaWalls define your exhibit space and transforms it into a creative selling environment. Striking visual effects can be achieved with sweeping floor-to-ceiling graphics up to 16' high. VersaWalls are cost effective for branded conference, theatre, demonstration and storage areas.

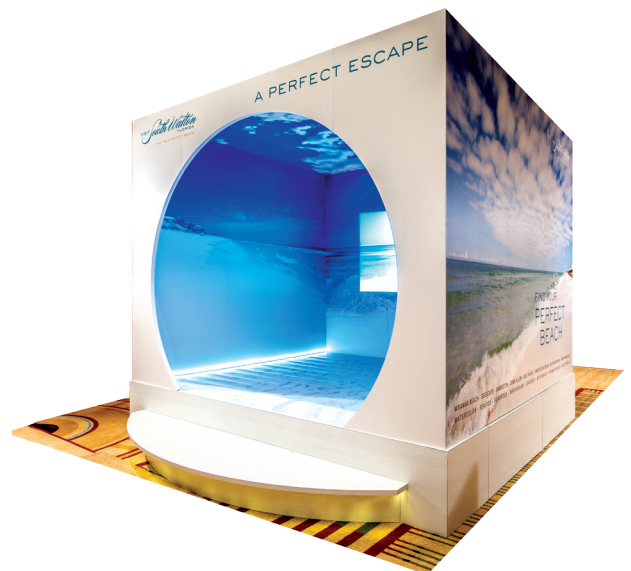

## Graphic Versatility

The VersaWall System is equipped to accommodate single or double sided graphic applications. Our proprietary double track extrusion delivers a true edge-to-edge finish concealing the structure beneath. Choose Silicone Edge Graphics (SEG) or rigid panels based on your individual event demands.

SEG spans walls and wraps around corners. Our SEG fabric graphics are custom-tailored to fit for easy assembly and a crisp finish. They are durable, fade-resistant, machine washable, have a NFPA 701 flame retardant rating and folds to ship compactly.

Rigid panels mount flush with one another without a frame profile in between like other Wall Systems. For the best presentation, Nomadic color matches your graphics across different media.

## Design Flexibility

VersaWall adapts to meet your exhibit marketing challenges. Whether you choose a purchase, rental or blended solution, it is capable of accomplishing a wide variety of designs now and in the future.

Walls can easily be reconfigured to accommodate multiple space sizes. Engineered to fully integrate with other Nomadic systems, you also benefit from the ability to upgrade and repurpose your investment to support new or different presentation functions.

A robust line of accessories including front and backlit LED lighting, merchandise shelves, integrated counters, tablet mounts and more offer functionality and high style.

## Reduce Expenses

VersaWall is a smart investment that delivers value and significant cost savings. Choose from knock down frames packed to ship compactly to lower your freight, drayage and storage costs or pre-assembled frames to reduce I&D time on the show floor. Our swift tool-free assembly also speeds I&D.

Ask about a custom modular rental design for freedom from ownership costs like storage, inspections, maintenance and taxes.

Our new pvc wire management track snaps into the frame to conceal and organize cords, 3-prong plugs and transformers. SEG wraps over our wire management track for a smooth rounded finish.

No loose parts to lose. Our exclusive quick cams are pre-installed in frames to make set-up faster. Just twist to draw and lock frames together side-by-side.

## Made in the USA

Nomadic uses eco-friendly practices in the production and delivery of all of our display solutions. Our graphics are printed with water based inks. Our aluminum structures are the finest quality, feature 80% post-consumer recycled content and are 100% recyclable.

## Lifetime Warranty

VersaWall frames are covered for a lifetime of ownership. Should any aluminum structure fail to function due to defective materials or workmanship, Nomadic will repair or replace it free-of-charge, for life.

Anywhere you go, a Nomadic Display showroom is nearby.
